My name is Shelia Shepherd and I live in Stockton Ca. I agree Southern California needs water, they also need to learn to conserve. And Store Rain Water. They have the ocean right in their back yard they can Desalinate. **Taking water from The Already Depleted Delta is not The Answer. Do Not build the Conveyance Canal.** Use the money to Desalinate the ocean. The Delta needs more water and not less.

Thank you for doing the right thing, and not stealing from peter to pay Paul. Build the Desalination plant and supply LA with what they need.
